

07. SQL String Manipulations & Date Formating

```
SELECT

id,

-- length functions

CHAR_LENGTH(full_name) AS char_length,

LENGTH(full_name) AS byte_length,

-- case conversion

LOWER(full_name) AS lower_name,

UPPER(full_name) AS upper_name,

-- substring (first 5 characters)

SUBSTRING(full_name FROM 1 FOR 5) AS substring_name,

-- trim functions

TRIM(full_name) AS trim_name,

LTRIM(full_name) AS ltrim_name,

RTRIM(full_name) AS rtrim_name,

-- replace text

REPLACE(full_name, 'a', '@') AS replaced_name,

-- concat example

CONCAT(full_name, ' - Employee') AS concat_name,

-- reverse string

REVERSE(full_name) AS reversed_name,

-- salary formatting

TO_CHAR(salary, 'FM999,999,999.00') AS formatted_salary

FROM employees

WHERE id = 1;
```

```
SELECT
id,
date_of_joining,

TO_CHAR(date_of_joining, 'DD-MM-YYYY') AS dd_mm_yyyy,
TO_CHAR(date_of_joining, 'DD Mon YYYY') AS short_month,
TO_CHAR(date_of_joining, 'DD Month YYYY') AS full_month,
TO_CHAR(date_of_joining, 'YYYY/MM/DD') AS iso_format,
TO_CHAR(date_of_joining, 'Day, DD Mon YYYY') AS full_readable

FROM employees
WHERE id = 1;
```
